

## Computer Organization and Assembly Language

**Class Test: 2**  
**Total Marks: 30**

**SOLUTION** Last Question **Instructor: Abdul Khaliq**  
**Time: 30 minutes**

---

### Question 4:

[5]

Find out the Line Number where an incorrect instruction reside, also correct that instruction? Is there any output of the following program after correction? .

```
1) .MODEL MEDIUM
2) .STACK 10H
3) .data
4)    ?WHAT Byte ?
5)    VARW WORD 1B4D
6)    VARW1 WORD -225D
7) .CODE
8) P1 PROC
9)    Mov bx, @data
10)   Mov bx, ds
11)       MOV ES,1234h
12)       ADD VARW,02H
13)       SUB 0ABH,DL
14)       DEC AL,1
15)   Mov ah,4ch
16)   Int 33
17)       Mov ah,02h
18)       Mov dl,'a'
19)       Int 21h
20) P1 ENDP
21) P1 END
```

**Line No (Having Errors) : 5,6,10,11,13,14,21**

**This program will not display anything (not display character 'a')**
